

The Stomach Is the Target

Aim to make that strong—and digestion good—and you will keep well! No chain is stronger than its weakest link. No man is stronger than his stomach. With stomach disordered a train of diseases follow.

Dr. Pierce's Golden Medical Discovery

Makes the stomach healthy, the liver active and the blood pure. Made from forest roots, and extracted without the use of alcohol. Sold by druggists, in liquid form at \$1.00 per bottle for over 40 years, giving general satisfaction.

If you prefer tablets as modified by R. V. Pierce, M. D., these can be had of medicine dealers or trial box by mail on receipt of 50c in stamps.

HOUSE FLY CHAMPION PEST

Costs the American People Many Millions to Sustain Him in His Position in Life.

A bulletin of the New York city board of health presents some rather stupendous estimates of the material cost to the community of the summer invasion of flies and mosquitoes. Taking alone the loss through typhoid, of which disease the fly is recognized conspicuously as a carrier, this is placed as an annual "decrease in the vital assets of the country" of more than \$350,000,000.

There are other items in the schedule of a rather startling character. The sum of \$10,000,000, it is figured, is paid annually for screens upon dwellings to keep out the flies. And yet enough of them get by the screens to work \$350,000,000 damage!

Evidently, we have begun at the wrong end to "swat the fly" effectively. And this fact has come to be widely recognized. It is prevention of breeding, rather than extinction of the race after the annual generation has been brought forth, to which attention is directed. If the fly is not born, there is no beginning to his pestilential career; he is non-existent. And the success which has attended measures taken for the suppression of the mosquito in neighborhoods hereabouts would seem to indicate the desirability of similar methods in the treatment of the house fly.

MAKING SECRET DRAWER.

A secret drawer for the deposit of money or valuables may be made as follows:

Bore a very small hole through the upright piece between the top drawers of a bureau and continue boring until the hole goes through the side of the drawer that is to be made secret. Whittle a wooden peg, and fit in the hole, neither too tight nor too loose, just so that it can be easily pushed through the hole with the little finger. The secret will not be easily discovered, because the opposite drawer will have to be pulled out altogether to push the peg in.

SAVED BY THE CONSTITUTION.

The late Thomas B. Reed, when a lad, was requested to bail out a small boat that had been leaking badly and was almost full of water.

"I can't do it," replied Tom. "It's unconstitutional."

"What do you mean?" inquired the owner of the boat.

"The constitution of the United States says," replied the future statesman, "that 'excessive bail shall not be required' of any man."—Youth's Companion.

EVIDENTLY A SUFFRAGETTE.

"Do you believe that the people should rule?"

"Yes, and also believe that the wives of the people should have something to say."

NOT QUALIFIED.

"Is Jinkie a professional humorist?"

"No, indeed. He never pokes fun at Philadelphia or Boston."

FILLING THE BILL.

"Has this play of yours got any punch in it?"

"Oh, yes, sir. There's a milk punch in the first act."

LOGICALLY.

"There are lots of profits in fortune telling, aren't there?"

"Of course. It's all prophecy."

ORIGIN OF "FIRE WATER"

Indian Method of Discovering If Traders' Whiskey Was Diluted.

When the Hudson's Bay Trading Company began its trading among the Indians it was found that by selling the Indians liquor they could more easily be introduced to trade their peltries.

The first whiskey or intoxicant of inferior quality was distilled in England and brought to America in large barrels, but in transporting it overland it was found more convenient to divide it into small kegs.

The traders soon became aware of the fact that by diluting the whiskey with water more furs could be obtained. This was practised for some time, but the Indians learned that good whiskey poured on a fire would cause it to flame up, whereas had the whiskey been diluted the fire would be quenched. It was by this simple experiment that the term "fire water" became a common word among Indians.

A chief who had experienced the bad effects of whiskey among his people said it was most certainly distilled from the hearts of wildcats and the tongues of women from the effects it produced.—From Bonfort's Spirit and Wine Circular.

Flagged Train With Shirt.

Tearing his shirt from his back an Ohio man flagged a train and saved it from a wreck, but H. T. Alston, Raleigh, N. C., once prevented a wreck with Electric Bitters. "I was in a terrible plight when I began to use them," he writes, "my stomach, head, back and kidneys were all badly affected and my liver was in bad condition, but four bottles of Electric Bitters made me feel like a new man." A trial will convince you of their matchless merit for any stomach, liver or kidney trouble. Price 50 cents at Crenshaw & Young.

No Stooing While Baking With Cole's Sanitary High Oven

Think of the advantages this Elevated Oven affords as compared to the old-fashioned cook stove or cast iron range.

The oven is on a level with the shoulders—so you have no lifting, no stooping, no steam or odors to inhale when baking in Cole's High Oven Range. You can operate the oven in a comfortable, erect position.

The natural course of heat is to rise. We have taken advantage of this and have placed the oven high instead of down low.

The heat rises around all four sides of the oven evenly. All sides are heated alike. Your baking will not be over-baked on one side and half-baked on the other. The temperature of the oven can be changed in less than a minute, yet you can keep it the same for over two hours on one charge of fuel—so perfect is the fuel combustion.

Every atom of heat is utilized, due to our patented Hot Blast Combustion (which burns the wasting gases) and to the patented air-tight construction, giving a great saving in fuel.

Cole's High Oven Range

equals the work of ranges which cost twice as much. This New Improved Cooker and Baker is a money saver for you to use. It will save fuel and will lessen your work—you have only one fire to give attention, 2 drafts to regulate, no dampers—it's simply a wonder. Let us show you its many good features which were made to please particular housewives.
